PERSONAL PROJECTS

Memories App (02/2023)
- Full Stack MERN Application (Using MongoDB & Express & React & Node.js) The app is called Memories and it is social media app that allows to users to post interesting events that happened in their lives.

Shop App (01/2023)
- Online shop built using Node.js, Express, and MongoDB/Mongoose. "In another version, I also used SQL (MySQL)/ Sequelize". The user can create an account, reset their password, add and remove cart items, upload and delete products, update data for products they added, checkout their cart, place orders, and view past orders. It follows the MVC design pattern, and renders views on the server using the EJS templating engine. The SendGrid API is used to send emails (confirmation of account creation and password reset instructions) and payments are handled using the Stripe API. Other features include pagination, error handling, validation of user input, sessions, authentication, and file storage.

Real-Time Chat-App (12/2022)
- Real-Time Chat-app with Websockets using Node.js , Express and Socket.io with Vanilla JS on the frontend with a custom UI.

RESTful API & GraphQL Server for Messages App (11/2022)
- A RESTful API designing with Node.js, Express, and MongoDB/Mongoose , Web sockets ,following the MVC pattern for messages App.
- A GraphQL Server designing with Node.js, Express, and MongoDB/Mongoose , Web sockets ,following the MVC pattern for messages App.

Hungry Help (2021)
- A web and mobile application which is a system for restaurants reservation , table management and food ordering and delivery with evaluation and management services

Posts-App (2021)
- Simple Post App Built by Flutter with (Apies + Clean architecture)proposed by Robert C. Martin. write clean, structured and most importantly bug-free code. Having a proper architecture is extremely critical as soon as your project grows to a substantial size.
